PLAYGROUND SAFETY SURFACING

▶ Doorway Threshold Ramps

Custom made threshold ramps provide equal access to any doorway, ranch slider, walkway, ramp or deck. The ramps create anti trip entry for the visually or physically impaired. With threshold height and doorway width measurements, Burgess Matting can provide the recommended complaint slope/length and an obligation free quote for ramps of all shapes and sizes. Perfect for providing easy access in both home and commercial settings.

▶ Decking, Stairs & Ramp Matting

Provides excellent traction for foot traffic and wheelchairs on wet, slippery access points and inclines. Matting is made to your design requirements and is 10-15mm thick.

- Very durable, non slip and is easy clean.
- Great for outdoor use as water drains freely away.
- Impact absorbent, reduces noise and vibration.
- Available with beveled edges and is polymerically bonded to provide a hard-wearing all weather surface.

▶ Impact Tiles

Rubber tiles provide good acoustics, insulation, anti-fatigue, non-slip and impact resistance while being easy to install and maintain. Suitable for internal, external, horizontal and vertical applications the tile provides durability, warmth and comfort.

- COMPLIANT TO NZ SAFETY STANDARDS
- LOW MAINTENANCE • NON-SLIP SURFACE • ALL WEATHER SURFACE
- CHOICE OF QUALITY SYSTEMS • OPTIONS TO SUIT YOUR BUDGET
- EQUAL ACCESS • IT'S SIMPLE AND IT WORKS!

WET-POUR SAFETY SYSTEMS

Wet-Pour Systems are high quality, seamless non-slip rubber surfaces. Installed on-site by our own experienced technicians to 50mm thickness, ensuring strict safety standards are met. For outstanding effectiveness, appearance, durability and the ultimate solution for safety in the playground, contact the team at Burgess Matting & Surfacing.

► Safebond Wetpour Features:

- Safe, durable and porous surface.
- Made from 100% recycled rubber.
- Allows surface contaminates to be easily removed.
- Available colours: red, green, black, grey, marigold, sage and sand.

Alternative Playground Safety Systems

► PermaBond Features:

- Topcoat made from 100% synthetic EPDM rubber.
- Porous surface allows fast, efficient drainage of water.
- Wide range of permanent vibrant colours.
- Use a PermaBond surface when child safety, low maintenance, good drainage and a bright colorful appearance are what you are looking for.

► Custom made Impact Pads:

Custom made to provide a cost effective solution to improve safety and reduce maintenance in high impact and scuff zone areas. Typically, these pads are best situated at the bottom of slides, below swings, and all areas where bark and dirt is continuously being kicked and pushed away upon impact.

► Modular Long Run Rolls:

Matting is purpose designed for installation by the client after being manufactured in our factory. Can be made from 12mm to 50mm depending upon the application. Installation simply involves locating the rolls and if desired joining with a rubber adhesive.
