

► HOW TO MEASURE

Ramps should have a gradient of at least 1 in 12.
e.g. If a mat is 50mm high at one end then the front to back measurement of the mat would be $.05 \times 12 = .6$ or 600mm. Also note on the plan if bevels are required mark the sides with an 'X'.

Take measurements in mm from exactly where you want the mat to be placed.

1. Left to Right, or Width of the mat, (measurement A),
2. Front to Back, or Length (how far out from the doorway that it comes, (measurement B),
3. Thickness, (measurement C) - how thick the ramp needs to be at the threshold.

Indicate door position on plan view and cut outs if required. D, F, G, H & J are examples of cut outs.

It's simple and it works!

Burgess Matting & Surfacing Limited is widely recognised for the manufacture and supply of many different types of domestic, industrial, recreational and commercial matting.

Burgess Matting & Surfacing are very proud of the range of matting available and have many extremely satisfied customers. We have passed the test of time and offer assurances of a high quality installation that present and future users will truly appreciate.

Ramps, entrance ways and reception areas can all be enhanced by the versatility of recycled rubber matting. Mats can be personally styled to match brands and colour schemes.

Ramps can eliminate trip hazards and can be specially made for individual situations, including providing equal access for wheelchairs, prams and mobility scooters.

We can manufacture any size of ramp from small doorways to large vehicle ramps.

Ramps provide smooth access for pedestrians or vehicles and minimize the possibility of accidents or damage.

Non Slip Access Mats

Retail Threshold Ramps

- ▶ Excellent traction for foot traffic and wheel chairs on inclines and in wet or damp areas.
- ▶ Durable, non-slip, long life, easy clean.
- ▶ Porous - the water will simply drain away
- ▶ Reduce trip hazards
- ▶ Custom made
- ▶ 100% Recycled & Proudly NZ made.

COMMERCIAL APPLICATIONS

Installation onto wooden or concrete surfaces. Bevelled edges to minimise trip hazards. Burgess ramps provide proven durability. Ideal for workshops and suitable for forklifts. Can be custom made to suit most environments. Ensure health and safety requirements are met. Call Burgess Matting today to discuss your requirements.
