► Safebond Wetpour Rubber Surfacing

Recycled rubber shred poured onsite to provide a seamless non-slip surface. At a minimum of 50mm in thickness, the coloured wetpour is installed over an impact absorbent underlay to meet your safety requirements.

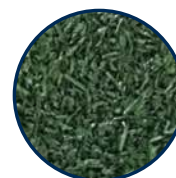

► Why Choose The Safebond Wetpour System?

- Made from 100% recycled rubber
- Easy to clean and little to no on-going maintenance
- Join free surface
- Very durable and UV stable
- Solid colour reduces heat retention
- Easy to repair unforeseen damage
- Customise options to create a unique surface
- All-equal access

► Customise your Safety Surface

Using the Burgess wetpour system, the safety surface can be customised to suit your purpose and surroundings. From simple variations in colour and texture, to unique designs and patterns; we will work with you to create your ideal play safe areas.

► Design and Surface Feature Ideas:

- Hop scotch
- Shapes and numbers
- Pathways and bike tracks
- Custom designs
- Branding and logos
- Animal outlines
- Highlighted areas of impact or hazard
- Custom designs available upon further discussion

Use the PermaBond EPDM colour range to really enhance your surface features!

New Zealand Made and Owned since 1951

Permabond Wetpour Rubber Surfacing

Synthetic EPDM rubber granule poured onsite to provide a pure colour seamless surface. With a wider range of vibrant and natural colours, permabond is an ideal way to incorporate surface features or to guarantee a longer lasting colour.

Why/when to use Permabond surfacing:

- Enhances surface features
- Porous and non-slip
- Seamless application with permanent joins
- Granule finish is easy to maintain
- Wider colour range allows for unique design
- Can be used in all weather conditions

► Playground Rolls and Impact Pads:

Custom manufactured to suit the shape and size of your safety area. From 15mm to 50mm thick, playground rolls remove a lot of the joins while providing an impact absorbent all weather safety surface. When located in high traffic areas, the impact pad stops wash out and scuffing of the base material while providing superior absorption and safety.

► Benefits of Custom Made Solutions:

- Made to suit any shape and size
- Bevelled edges built into matting
- Porous and non-slip
- Made in NZ using recycled rubber
- Noise dampening
- Permanent protection in high impact zones
- Less joins reduces risk of future issues
- Easy to self install
- 7 different colours to choose from – P1

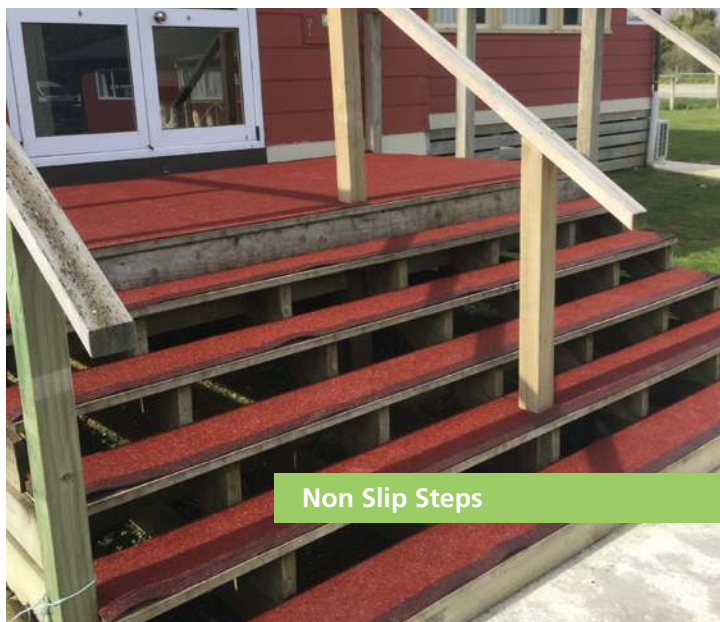

Doorway Threshold Ramps

► Doorway Threshold Ramp

Provides equal access to any doorway, ranch slider, curb, pathway or any other situations with a threshold step. The ramp is made to fit; with any indents, beveled edging, compliant slopes or site specific details built into the manufacturing of your threshold ramp.

- Very durable and non-slip
- Quiet entry for foot and wheels
- Can be loose laid or permanently fixed in place
- Made in New Zealand using 100% recycled rubber
- Custom made to fit

Non Slip Steps

Fibrebond Matting

► Impact Tiles

Designed and manufactured to provide specific properties to suit the application at hand. Using different grades of rubber we can alter the density, non-slip, impact and sound absorption qualities of the tile. Recommended uses include gyms, playgrounds, stairwells, decking, offices, cafes and retail stores.

► Dura-Seal Non-Slip Surfacing

Seamless non-slip system permanently bonded to the existing surface. Dura-seal provides an ideal way to refresh worn, slippery and splintering timber.

- Suitable for high traffic areas - foot and light vehicles are OK
- Can be coloured, applied to slopes and easy clean
- Highly durable all weather surface
- DIY repairs are very easy for unforeseen damage
- Different grades of rubber available to alter the non-slip property
- Made in New Zealand using recycled rubber

New Zealand Made and Owned since 1951

- LOW MAINTENANCE • NON-SLIP SURFACE • ALL WEATHER SURFACE
- CHOICE OF QUALITY SYSTEMS • OPTIONS TO SUIT YOUR BUDGET
- EQUAL ACCESS • COMPLIANT TO NZ SAFETY STANDARDS • IT'S SIMPLE AND IT WORKS!

► Artificial Grass

- State of the art UV protected yarn
- Combines real lawn looks with affordability
- Durable and hassle free lawn for commercial and landscaping applications
- Varieties to suit all tastes and budgets
